Adjustment layers are essential tools for making reversible edits without altering the original image data. Here's how to leverage them:

- With your image open, go to **Layer > New Adjustment Layer** and select an adjustment such as **Levels**, **Curves**, or **Hue/Saturation**.
- A new adjustment layer appears in the Layers panel above your image layer. Any changes made affect only the layers beneath it.
- Use the adjustment layer's properties panel to tweak settings. For example, moving sliders to adjust tonal range or color saturation.
- To restrict the adjustment to a specific area, right-click the adjustment layer and choose **Create Clipping Mask**. This confines the effect to the layer directly below.
- Adjust or remove the adjustment layer at any time without permanently affecting the original image. Simply double-click the adjustment icon or delete the layer.
- Stack multiple adjustment layers for complex color grading or tonal corrections, turning adjustments on/off as needed for comparison.
